PRINCIPAL’S REPORT
Brad Madden

Education Week
Throughout this week, Ms Hollis and I have spent time showing visitors through the College to see the wide range of classes in operation. It has been pleasing to see a number of people have taken the opportunity to see the school on a regular day with students in class, moving between classes and working on a variety of different learning tasks. Our visitors have been impressed with the opportunities available to students in the core learning areas and the many electives in Technology, Arts, Physical Education and Languages. While Education Week is a great chance to get involved even for parents who already have students at the school, we are also able to show people around at other times throughout the year so please encourage any prospective parents you may know to contact the College to make an appointment.

Compass implementation
Another aspect of the College that has impressed visitors and current families alike is the Compass online learning management portal. While we understand that some students and parents are still coming to terms with the full functionality of the program, the benefits of enhanced communication and record keeping will far outweigh the temporary inconvenience of learning the nuances of the program. One of the features of Compass that parents will appreciate is the provision of comments relating to each assessment task written by teachers in a similar format to what is included in reports. This ensures that parents can discuss achievements with students and become aware of areas in which support may be required in future work tasks. Please contact the College if you are having trouble accessing any of the features of Compass.

Mid-year reports
The mid year student reports will be available through Compass as the Interim Reports were at the end of Term 1. Thanks to the Compass program, the majority of the comments and feedback for parents will already be available. The final components of the report will include the rate of attendance, a summary of effort and behaviour, areas for improvement and the comments on the final assessment task for the term which will be submitted in the last week of term. For this reason, the final report will not be compiled and available until early in Term 3. This will ensure that students are given maximum time to complete their work tasks and teachers the time to correct them and provide feedback. If you would like a hard copy of your child’s report, this will be provided to you by request through the College office.

Volleyball State Championships
Our Year 9/10 Boys Volleyball team headed to Melbourne for the SSV State Championships yesterday. While they were not able to bring home the title, they represented the College with distinction at the highest level, as they will also do next Friday when they attend another state level competition for which they have qualified. The team also received a visit earlier in the week from MP Maree Edwards to wish them well in their endeavours.

BITE
BITE is the acronym for the Bendigo Innovation Technology Experience which was launched recently by local MPs Maree Edwards and Jacinta Allan. BITE is a new facility that will be located at Latrobe University and will host students from existing colleges and focus on science, technology, engineering and maths, with the curriculum to reflect the city’s emerging economies. There is currently a representative steering committee commencing the planning for this exciting new development which will commence operation in 2018 and include programs for students in all year levels at Crusoe College.

Road works in coming months
We have been contacted by VicRoads who have informed us that there will be extensive road works on the round about at the intersection of Olympic Parade and Mackenzie St West in the next two months. This will result in delays for traffic moving through the intersection and the need to re-locate the school buses and public buses to an area on Olympic Parade. Signs will be placed in the vicinity of the works in the weeks leading up to the commencement which will detail possible detours and advise of the delays in travel time which will also affect buses.
Website
The College will soon launch an updated website that you will find more informative and easier to navigate when looking for images, documents or announcements. The website will still have the same address but when you access it, you will see different images and tabs from which to select. It will also include a number of "live" sections where there will be notices and announcements being updated on a regular basis. In the long term, it is envisaged that sections of the website will replace this newsletter as we establish alerts and updates to enable families to see when pertinent information is added. Check it out when you get a chance and let us know what you think.

Victorian Curriculum implementation
The College is currently working with experts from the Victorian Curriculum and Assessment Authority to plan the development of the curriculum for 2017. Part of this work will include a student free day early in Term 3 to work with specialist teachers and staff to ensure that the curriculum we offer is the best that can be in place for our students. The exact date of this day will be notified to parents at the earliest possible opportunity.

Reminder
Parents and visitors to the College are reminded that it is necessary to sign in via the College office for all visits. This is standard procedure to ensure the safety of all students, staff and visitors.

Teachers, Parents and students are all logging on and making use of the various capabilities and advantages of the Compass school management software. One area which parents are taking advantage of is the detailed attendance summary. This is useful to track attendance and give positive feedback for attending all classes on time. Please contact the school if you are having trouble logging on or would like some support in using any aspects of compass.

---

CITY OF GREATER BENDIGO FOR TERM 2
PARKING AROUND CRUSOE COLLEGE

Parking and Animal Services from the City of Greater Bendigo have contacted our school and requested that the following information be conveyed to our school community.

The illegal parking of vehicles adjacent to our school poses a safety concern to children, pedestrians and other road users. Parents are reminded that it is essential to comply with parking restrictions when dropping off and collecting children from school.

Motorists must not stop in no stopping areas, even briefly, with or without the motor running. They must not stop next to a continuous yellow edge line, on resident’s nature strips, too close to school crossings, park over driveways or double park. A number of schools have short term time restricted areas, such as 2 minute pick up drop off. These parking areas are in place to allow for ease of access close to schools and these restrictions must be adhered to. Drivers should also be aware that they cannot perform a U-turn over an unbroken or continuous dividing line.

With regard to children’s crossings, the law requires that a driver approaching a children’s crossing must drive at a speed at which the driver can, if necessary stop safely before the crossing. Please slow down and take extra care when driving in school zones.

City of Greater Bendigo Parking Officers and Bendigo Police do conduct random patrols throughout the school year at various locations to ensure that motorists are adhering to the Road Rules.

**Year 10 News**  
Chantelle McMillin—Careers/Work Experience

**MIPS, Work Experience and the Next Step**  
This Term in Advisory students are continuing work on their Managed Individual Pathways (MIPS) folders. They will focus on mapping out their subjects for this year, their interests, activities both at school and extra curricula and begin to examine the different qualifications for different pathways in which they may be interested. This is very important as it forms the start of their transition process and is the beginning of supporting both the student and their family in their pathway for 2017.

It is essential that all students are actively involved in this process and that they are on time to Advisory and ready to learn. This process will help Advisors and the transition team in working with both the student and the family to determine the best program for future success.

At the same time students will also be working closely with their Advisor and with myself or David Pocock to organise their work experience for September. It is vital that students are continuing to work on this process to ensure they are placed in a valuable placement that reflects their interests. Work Experience placements are extremely hard to come by and may take months of working with businesses to secure a placement. There is paperwork to complete and businesses are often flooded with requests. We are working with our students in Advisory to make this a smooth process and ensure the best possible results for our students. In Advisory, students will begin scripts that will help them in approaching businesses and they are encouraged to take their MIPS folder with them when meeting with a business to show their Occupational Health and Safety Certificates and any notes and preparation.

Each MIPS folder should contain a copy of the student’s resume, a cover letter and other documents that show businesses and family members the process we go through in choosing work experience and the steps leading to decisions regarding future education. Students who miss Advisory are encouraged to work on this at home and share this planning resource for the future with their families.

To support this process there will be a number of guest speakers during Term 2 and 3 to help students in making decisions regarding courses for their future education and subject choices. We will also have ex Crusoe Students coming to present and give vital information about their transition experience and what to expect.

**The first part of this Transition Process will begin on June 15 with the BSSC Expo**  
The expo will take place during Advisory, session 1 and 2. It is at no cost to the students and students will gain the following insight into different pathways that are available to them.

**This Expo aims to provide your child with:**
- Assistance to see the link between their subject choices and a suitable Pathway Community as this can often be a difficult decision;
- Another forum through which they can receive information about our Pathway Community model. This is an area that is often missed in the Course Counselling process due to many other factors having to be considered;
- A fantastic transition opportunity to tour college facilities outside of Open Day during normal class time. Students have the opportunity to become excited about what is on offer. This will also hopefully allow them to feel more comfortable about attending BSSC for Transition in November;
- Advice about a course that is right for them, and how to link this to their Pathway Community. Teachers from different subject areas will be available to discuss course selection with students.

**This expo is aimed at all Year ten students** in the hopes to discover a pathway that will suit everyone and not just those intending on completing their VCE.

**Students will have access to La Trobe University, TaAFE and BTEC information.**

This expo is information only and given that other educational resources are on offer, it is vital for everybody to attend. It does not matter if a student is thinking that BSSC is not for them – it is a chance to see the school and talk to other educational providers such as, TAFE and BTEC.
It’s been a very busy and productive second term within the Ipsen Community. This week marks the half way point of the term and my message to students at assembly was to focus on work completion as we head into the back of the term. I underlined the need for students to take responsibility for their learning and develop effective work habits which builds successful learning outcomes. This is the most important focus for secondary school students.

Again our ‘Ipsen Eagle’ who is our regular newsletter contributor has written a report below on all things Ipsen from the past few weeks;

Earlier this term, Ipsen House participated in and won the 2016 Crusoe Athletics Sports. WOOHOO!!!!! This was a huge day with a fantastic result for us. Ipsen students showed determination and persistence in all events across the whole day. It was great to see Year 7, 8, 9 and 10 students giving it their best shot.

Two weeks ago the House Cross Country running was held at Crusoe Reservoir. The amount of Ipsen runners was incredible, again with our students putting in and having a go. Below is a photo of some of our many successful runners on the day, most of whom have gone onto and represent the college at the next level. Well done to all competitors.

The Arts Science Festival was also very successful with everyone having fun and allowing their creative sides to flourish. The work shops were amazing and allowed us to focus on something different than the usual classes and be creative. The showcase on the Thursday afternoon was a great opportunity to celebrate the work, interact with parents, community members and staff.

The past few months has highlighted the Ipsen moto of ‘participation’ with so many great events and occasions where Ipsen students’ persistence and determination has been on display. Go Ipse!!!!!! from the Ipsen Eagle......

IPSEN EAGLES SOAR
DYSON Community News
Carole Waterson—Community Leader

It’s been a very rewarding term so far watching our Dyson students contributing toward their Community in many different ways! The Arts/Science Festival saw the completion of wall murals in our Community and around the school. Well done to our Year 10 girls who completed amazing murals showcasing the school values and our Dyson logo.

We celebrated many individual student successes at the Athletic sports with Ella and Will taking out Age Champions and scoring themselves a Dyson Bluey Award. Beatrice and Isaac also won Bluey Awards this week with a win at the Crusoe Cross Country. Jesse scored his first Bluey with his dedication and achievement in the Energy Breakthrough team. Final Bluey went to Kayley for her outstanding leadership contribution at the recent Anzac ceremonies at Crusoe College and the wider community. Well done Direwolves!

MADD (Make A Difference Dyson!) is back this term! Every two weeks one student is selected from each year level to do a good deed in the school, home or community. They will report back at the Community Assembly and share what they have achieved. Students are encouraged to move out of their comfort zone to make a REAL difference!

This week’s nominees are: Jaz, Bailey, Keily and John P. Good luck guys, dig deep!

Our Year 7 and 9 students are to be commended for their attitude and effort toward the NAPLAN testing last week. This can be a very stressful time for some, however, we were impressed with our students’ great attitude and eagerness to do their best. Their results will be helpful in setting their goals for the rest of the year.

HOME OF THE DYSON DIREWOLVES
**Numbers**  
**By Rachel Ward**  
By looking into someone’s eyes, Jem can see the date of death. This ‘gift’ has afflicted her for her whole life and she has kept it secret from the world. She predicted the date of her mother’s death from an overdose and as an orphan she has been moved from one family to the next. Now, she lives with her foster mother and two little brothers. Jem avoids company and keeps to herself until she is befriended by Spider. Sadly she glimpses his death day yet she falls for his friendship and thus begins another chapter of her life. For the first time in her life she feels the love and care of another human.  
While playing truant from school at the London Eye, Jem notices that a number of people have the same death date. She is immediately overcome with impending doom and flees in fear just in time to avoid a massive explosion. However, the pair were caught running from the scene by security cameras and are suspects of this terrorist attack. The pace of the story quickens as they escape and try to survive in the country side. Spider does everything he can to keep them safe, and so does Jem, but she is also keeping track of the days until the unthinkable happens to her best friend and love interest.

I loved Jem’s character and her believable voice. The plot skipped along and the characters are outsiders who are real and gritty but the reader cares for them. The story was action packed, heartbreaking and full of struggles. It was well written and no word was wasted.  

Mrs Marchingo’s STAR rating 5/5

**Accessit**  
The GLC is about to install a new library management system. Susan Groom and I are very excited because our old Library Management System was becoming antiquated and not fit for purpose. After much research we decided upon ‘Accessit’, a product that comes highly recommended from schools within our region. Students and staff gain 24/7 access to the Library catalogue from a range of devices by using Apps or going online. All students have their own homepage and record their reading and viewing and rate or review books that they can share with their fellow students. Students can make book recommendations, reservations and renew their books from the comfort of their own home. An exciting feature is the built in bibliography generator that will automatically create a reference list for all books, articles, documentaries that they use. The system will also be linked with ClickView and provides and one stop shop for students. Here is a testimonial from one school.
CURRICULUM NEWS
Jill Clapham

The last few weeks have been very busy, with NAPLAN for Years 7 and 9 students and many excursions adding to the depth of curriculum experiences for students. Reports of all these excursions will be included in future Newsletters.

Managed Individual Pathways (MIPs). Today all Year 7 students visited La Trobe University for an introduction to Uni life. This was their first step in the School Partnership Program that Crusoe College has with La Trobe University. Today our students met and worked with the La Trobe Student Ambassadors. This relationship will be developed further over the next three years. The program aims to inform students about the possibilities of careers they might follow, some that require a University education and others that do not require a University education.

Astronomy. The combined Year 9 and 10 Astronomy class has two exciting learning opportunities coming up in the next few weeks:
On Wednesday June 1st representatives from the Bendigo District Astronomy Society will bring their telescopes to Crusoe for a viewing night. This promises to be an exciting experience with Mars, Jupiter and Saturn in view, as well as an exploration of the winter constellations. The College community is invited to join us in the carpark beside the oval off MacKenzie Street West from 7.30—9.30pm Please reply to the emailed invitation or ring the College if you plan to attend. This will enable us to arrange for a sufficient number of telescopes to be available on the night. This is an outside event so please dress warmly. If it is raining or overcast, we will postpone to the next night Thursday 2nd June.

On Wednesday June 8th our Astronomy students will take part in an online session with a practising Astronomer. We will link via Polycom technology to the Centre of Excellence for All-Sky Astrophysics. You can visit the website at the link http://www.caastro.org/education-and-outreach/school-engagement/caastro-in-the-classroom
We will be taking part in a session designed for Year 10 science students, along with other schools from across Australia. The session will explore the scientific understanding of the Big Bang theory.

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

ANIMATION and MULTIMEDIA ELECTIVE—Get into Gaming Expo, Ballarat

This year, as part of the Ballarat “Get Into Games” expo, 28 Crusoe College students attended. The expo offered the opportunity for students to learn about potential career options within the gaming industry.

The day started with a very early morning bus trip to Ballarat. When we arrived at the hall, we found the games expo was well underway. The hall was filled with games and information booths. There were schools from all over Victoria in attendance, we were given the opportunity to speak with people from all aspects of the gaming industry; including programming, graphics, and numerous others, which provided us with a look into what it takes to make a game and how it begins in the industry. We were also given access to not only look, but to play a wide range of different games, from the present, but also past games on many different gaming platforms. There were arcade games such as Donkey Kong and Mario, as well as future games like virtual reality on the Oculus Rift, and new release games such as Uncharted 4. Throughout the day there were many presentations from Australia’s leading game developers who are all currently working within the industry, they talked about what their particular jobs are within the gaming industry. They also discussed pathways to help us get into the gaming industry.

We had our lunch break during which there was a presentation from the female presenters, which was aimed specifically at girls interested in the games industry. The talk encouraged girls to definitely consider a career in the gaming industry, as there are many opportunities out there.

At the end of the day, after a quick survey, we were given goodie bags, which contained Federation University course guides, various brochures and other things like screen cleaners, drink bottles and other bits and bobs. We got on the bus for the long drive back to Bendigo and arrived back at 4pm with much enthusiasm about our new found knowledge.

Aneta Clayton and Rachel Croucher – Year 10
ENERGY BREAKTHROUGH TEAM NEWS
Alistair Sharp

Our enthusiastic Energy Breakthrough Team members had an early start on Saturday morning as we loaded up the van and trailer and headed off to Loxton, a small town in the Riverland of South Australia, to compete in Round 1 of the Australian International Pedal Prix. Our vehicle ‘ATLAS’ was scrutineered and passed with flying colours. We then went off and set up camp at the Loxton Riverside Big 4 Caravan Park, to have a restful night before racing on the Sunday.

There was an early start on the Sunday, packing up camping then going in and setting up our pits, before racing started at 10am. This was our first foray into the this particular series, therefore we had to start from the back of our category. We were being described as the dark horse by the commentators, as the event was live streamed around the world.

Will McClure-Wallace got us off to a strong start and brought us up to third in our category. Solid performance from experienced riders in Tayla Matotek and Ash Watson held our position well and extended our lead on fourth. We then had three riders with limited to no experience entering the trike. Natalie Watson put in an amazing performance, before our only crash of the day was first time rider Michael Keating. He didn’t stop though he just kept on pushing which was a great effort. Experience then brought us home with Jack Hayes and Angus O’Dea. We had an hour left so we decided to put Will in for a second short fast stint.

Unfortunately as he left pit lane he was stopped and forced to return. The officials discovered our horn had stopped working. Disaster was appearing across our teams faces. Thankfully former student, Sam O’Dea, appeared as our Knight in shining armour, He was able to rig up the horn so it would get us to the end of the race. Will took off at alarming speed to complete his short stint, before Jesse Annand jumped in and brought us home. Even though we had this horn issue late in the race, great performances right throughout the day meant that we were able to hold on to third place in our category, a great effort for our first race in this series.

The team completed 112 laps, 171km in the 6 hours. Well done to all competitors and our pit crew of Keiran Theobold and Fletcher Cornish. A very big thank-you to all the other help from Kaylene Matotek, Bryan Hayes, Heath Watson and Amy Hall.

Our next race is likely to be The Bendigo Pedal Prix in August.

Our next fundraising event is a Bunnings BBQ on Sunday June 19th.
